Pedro Antmann

- Uruguayan mechanical engineer graduated in 1979.

- Lead Energy Specialist at the World Bank in Washington, D.C., USA, working in the areas of institutional restructuring, regulation, tariffs and management of utilities (including incorporation of IT applications). Since September 2008 he was member of project teams in more than 50 projects in the 6 regions where the Bank develops operations.

- 16 years (1979-1995) in the Uruguayan state-owned vertically integrated electricity company (UTE), in the areas of thermal power generation (operation of existing plants and planning and commissioning of new ones), transmission, national control center, international power exchanges, distribution and retail. He left the company in 1995 being the General Manager.

- 3 years (1995-1997) in the Ministry of Industry, Energy and Mines, initially as Director of the National Board of Energy and later as deputy Minister of Industry, Energy and Mines, in charge of energy. He prepared a bill defining a new regulatory framework for the electricity sector and conducted the process for incorporation of natural gas from Argentina (regulatory framework, issuance of concessions to private agents).

- 3 years (1998-2000) in the French water and sanitation company Suez Lyonnaise des Eaux as International Manager, in charge of operations in the affiliate company serving 3 million customers in Buenos Aires, Argentina.

- 8 years (2000-2008) as partner and Senior Consultant in Mercados Energy Markets International, a consultancy company specialized in institutional restructuring, regulation and management of the energy sector. He conducted projects in more than 40 countries in Latin America, Africa, Europe and Central Asia, Middle East, South Asia and East Asia Pacific in the fields of design and implementation of new regulatory frameworks, tariff setting for network industries, management of utilities (including incorporation of IT applications), rural electrification, benchmarking studies for electricity companies.
