# RENOVÁVEIS EM MOÇAMBIQUE 2022

BUSINESS CONFERENCE  
Renewables in Mozambique 2022

MAPUTO 6/7 DEZEMBRO • DECEMBER

## The opportunity

Mozambique targets 100% electrification by 2030

Significant financing available for (off-grid) energy access

Recent Government and regulatory steps enabling growth in off-grid solutions

## The challenge

Multiple large subsidy/RBF programmes with similar scope

Lack of comprehensive, comparable and user-friendly data on performance and risk

Lack of consolidated view on the sector: efficient financing of energy access strategies difficult

## The solution

# Data Driven Approach

Trusted operational and usage data combined for low cost and effort real-time energy access impact tracking

ORGANIZAÇÃO

## RENOVÁVEIS EM MOÇAMBIQUE 2022

BUSINESS CONFERENCE  
Renewables in Mozambique 2022

MAPUTO 6/7 DEZEMBRO • DECEMBER

### 1: National Authority

Oversight of actions:  
electrification progress of grid  
extension, minigrids and  
standalone solar solutions

### 2: Subsidy Manager

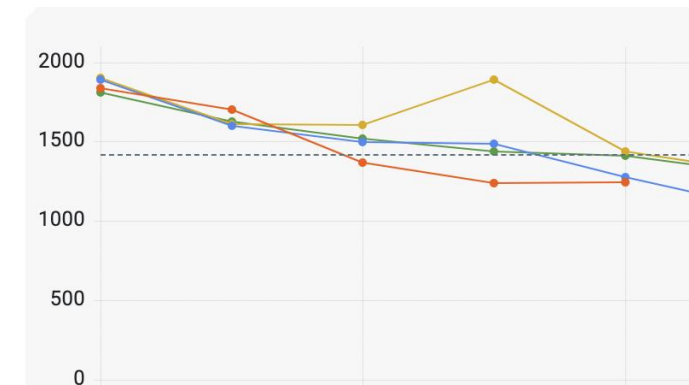

Data driven monitoring and reporting on  
programme status, based on  
fingerprinting and heartbeat - long term  
sustainability

### 3: Energy Provider

Insight into operations based on  
data provided to Prospect =>  
driving business decisions

Automatic impact and financial  
performance reporting

✓ Cohort repayment comparison over time
