MAPUTO 6/7 DEZEMBRO · DECEMBER

GET FiT in Mozambique

- **GET FiT** is a German funded initiative that has been implemented in Uganda since 2013 and Zambia since 2017. Implementation initiated in Mozambique in 2022.
- **GET FiT** aims to **unlock private investments in renewable energy** through an efficient and transparent investment framework based on standardized procedures and documentation

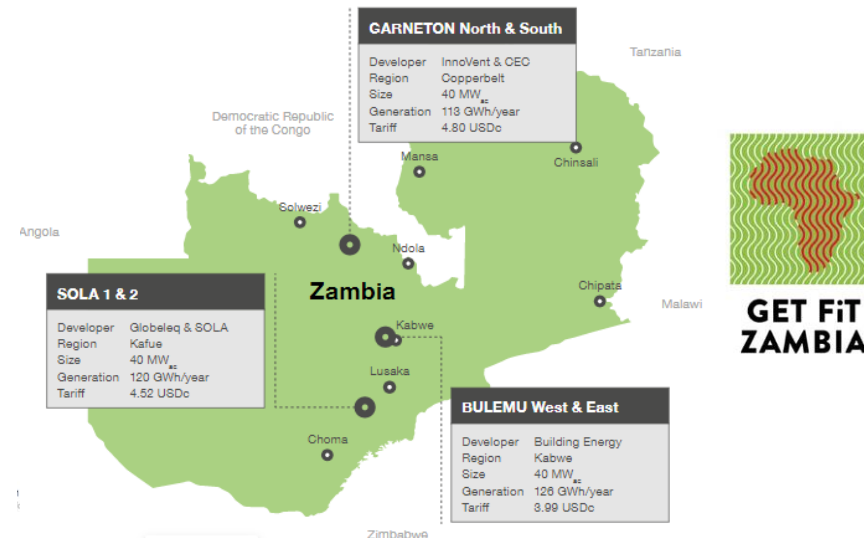

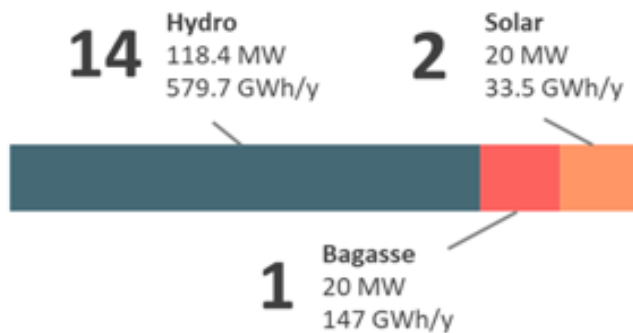

Objective
To build a favourable framework for private investments in RE, based on standard procedures and IPP documentation, and a strong institutional framework with the necessary commercial, legal, technical, E&S management related knowledge and experience

GET FiT in Mozambique value proposition

CHALLENGE

Long distances between the large generation centres and most important load centres, with long and often overloaded power lines resulting in poor power supply quality.

Traditional strategy to address transmission constraints

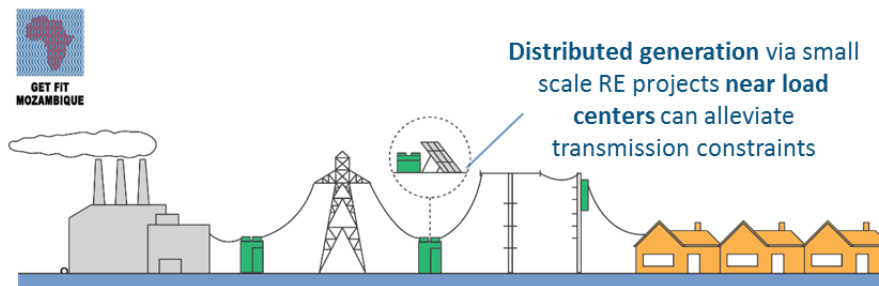

GET FiT MOZAMBIQUE SOLAR PV + STORAGE

will solicitate investments in relatively small-scale (indicatively 4-15 MW), grid connected renewable energy Independent Power Producer (IPP) Projects at predefined sites in the EDM grid, with EDM as key off-taker and counterpart of the Power Purchase Agreements (PPA)
A second round for Small Hydro is foreseen

GET FiT PROPOSITION

Locating distributed generation with storage capacity near the load centres is expected to improve supply capacity with lesser need to upgrade the power transmission network.

GET FiT alternative option – localized and targeted RE

BUILDING ON EXPERIENCE FROM UGANDA & ZAMBIA – AND MOZAMBIQUE

Successful tenders require a well designed, transparent and efficiently implemented competitive tender to yield good prices and timely results. But also capable and enabled institutions and investors.
