

To whom it may concern, and possible future Members,

The installation committee of **ASAER – Angolan Renewable Energy Association**, recently created, has the pleasure to invite you to participate in its first public act towards renewable energy development and promotion in Angola. We have prepared a simple and short survey that we invite you to answer. You'll find questions regarding renewable energies in Angola, and we also invite you to give your opinion about the direction that an association as ASAER should take. We are taking the first steps and we would like to count on your cooperation to help you accurately and as efficiently as possible.

[Here](#) you can access the survey and answer following the guided steps. Don't forget to forward this email to a friend that shares some interest or the same concern, given that the deadline is **30th April 2020**.

We remind you that ASAER is an association governed by private law, nonprofit and has the mission to promote and develop renewable energies in Angola. We are strongly convinced that by developing and promoting the use of this energy source, we are preserving the environment and at the same time contributing heavily to the sustainable socio-economic development of our country.

We thank you in advance for your interest and participation, and we hope that soon you'll be part of our association.

With renewable and ecological salutations,

The installation committee of ASAER – Angolan Renewable Energy Association
